

Multi-million deal with Gasum signed by Paques Europe

January 22, 2019

Gasum End of December 2018, a multi-million contract with Gasum, the Nordic gas sector and energy market expert from Finland, was signed by Paques Europe. The contract included the supply of BIOPAQ®ICX anaerobic bioreactors and a THIOPAQ® gas desulphurisation installation in order to treat the wastewater stream and production of biogas from Stora Enso's Nymölla paper Mill.

The energy company Gasum and Stora Enso have signed a contract in October 2018 to build a biogas plant at Stora Enso's Nymölla paper mill in Sweden. The plant, built and operated by Gasum, will turn the mill's waste water effluent into renewable energy.

Gasum plans to produce Liquefied Biogas (LBG) and sell as fuel for cars, buses, trucks, and ferries. The Nymölla biogas plant project includes biogas production, upgrading and liquefaction. The expected LBG production of the plant is 220 MWh per day. Start-up is expected during 2020

Picture: Located in southern Sweden, Stora Enso's Nymölla Mill has an annual production capacity of 340 000 tonnes pulp and 485 000 tonnes woodfree uncoated (WFU) paper for office and postal use. Stora Enso's well-known office paper brand Multicopy is produced in Nymölla

More on Gasum

The energy company Gasum is a Nordic gas sector and energy market expert. Together with its partners, Gasum is building a bridge towards a carbon-neutral society on land and at sea. Gasum imports natural gas to Finland and promotes circular economy by processing waste and producing biogas and recycled nutrients in Finland and Sweden. The company offers energy for heat and power production, industry as well as road and maritime transport. Gasum is the leading supplier of biogas in the Nordic countries. The company has a gas filling stations network that also serves heavy-duty vehicles. Gasum is also the leading liquefied natural gas (LNG) player in the Nordic market. The company continues to strengthen the position and infrastructure of LNG and supplies LNG to maritime transport, industry and heavy-duty vehicles in Finland, Sweden and Norway.
